

Dear Eric,

Thank you so much for introducing our staff to Pure Water Technology.

We have been getting the artesian spring jugs delivered in for years, and wanted to get a much better perspective as a company, if we were adequately hydrating, and most importantly, if our staff trusted drinking the delivered spring water.

We decided to put in a trial of your water purifier for a few days, and to our shock, the consumption skyrocketed.

Our employees were drinking almost double the amount of water on your system compared to the jugs.

After seeing first hand a major increase in our staffs overall hydration, and the positive feedback across the board, I know it was no coincidence.

Having a system in place now that is purifying and removing all metals from the water, and most importantly keeping the tank and lines clean at all times with your patent, verified to myself and our staff that we made the right decision going with this update.

Thanks again,
