

The Office Hydration Safeguard!

Our 3i Bottleless water purifier supplies safe, healthy and pure drinking water at the point of use.

Clean Contact™

Anti-microbial touchpad surface and surrounding surfaces manufactured and tested to protect against cross-contamination of germs within the workplace.

24/7-System Monitoring

At the core of our technology is a microprocessor that controls and monitors activate oxygen injections, filter life, water quality and all other system functions 24 hours a day. Only the 3i delivers this level of programmability and performance that keeps your water fresh and pure.

Activated Oxygen Injection

Oxygenates the water during the injection process, delivering pure and fresh water.

ATS-Auto Tank Sanitization

Eliminates microbiological contamination and does away with the tedious and often overlooked task of sanitizing the holding tank.

Pure Touch Dispense

The ergonomic design delivers an optimum dispense height and spacious dispense area for large containers which prevents germ contamination of the dispense nozzle.

Filter Replacement Notification Light

Notifies you when the filter needs replacing by our service team, ensuring the highest quality of freshness.

Dispense Area Light

Illuminates dispense area (4 brightness options) to easily identify drip tray "bulls eye" for precise dispensing—keeping the work environment clean of water spillage.
